Introduction

1. Introduction

- 1.1 This document sets out the Ground Rules for the construction and management of the FTSE TPI Climate Transition Index Series. Copies of the Ground Rules are available from https://www.lseg.com/en/ftse-russell/. TPI stands for the Transition Pathway Initiative.
- 1.2 The FTSE TPI Climate Transition Index Series is designed to reflect the performance of stocks, taking into account a specific set of TPI and climate data.
 - The FTSE TPI Climate Transition Index Series is not designed to align with the minimum requirements for EU Climate Transition Benchmarks or the EU Paris-Aligned Benchmarks¹.
- 1.3 This index series takes into account ESG factors in its index design.
 - If a tilting approach is used for an ESG data input, the objective is for the index methodology to overweight and/or underweight constituents according to specific ESG criteria. This approach will not remove all companies with exposure to a specific ESG activity or sector.
- 1.4 These Ground Rules should be read in conjunction with the following index rules and guides, which are available at https://www.lseg.com/en/ftse-russell/:
 - FTSE Global Equity Index Series Ground Rules
 - The Corporate Actions and Events Guide for Non Market Capitalisation Weighted Indices
 - FTSE Global Factor Index Series Ground Rules
 - FTSE EU Climate Benchmarks Index Series
 - FTSE Global Climate Index Series Ground Rules
 - FTSE Green Revenues Index Series Ground Rules
 - FTSE Infrastructure Index Series Ground Rules
 - FTSE Capping Methodology Guide
- 1.5 Price and total return indices will be calculated on an end-of-day basis. The base currency of all indices is US Dollars (USD) and may also be published in other currencies. Total return indices include income based on ex-dividend adjustments. All dividends are applied as declared in the FTSE Total Return Index.
 - The following variants are calculated for certain indices within the index series:
 - Additional customised variants
 - Currency hedged indices

FTSE Russell 3 of 31

¹ The requirements are set out in Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the European Benchmark Regulation) and the Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris aliqued Regulation.

1.6 FTSE Russell

1.7 FTSE Russell is a trading name of FTSE International Limited, Frank Russell Company, FTSE Global Debt Capital Markets Limited (and its subsidiaries FTSE Global Debt Capital Markets Inc. and FTSE Fixed Income Europe Limited), FTSE Fixed Income LLC, FTSE (Beijing) Consulting Limited, Refinitiv Benchmark Services (UK) Limited, Refinitiv Limited and Beyond Ratings.

1.8 Statement of Principles for FTSE Russell Equity Indices (the Statement of Principles)

Indices need to keep abreast of changing markets and the Ground Rules cannot anticipate every eventuality. Where the Ground Rules do not fully cover a specific event or development, FTSE Russell will determine the appropriate treatment by reference to the Statement of Principles which summarises the ethos underlying FTSE Russell's approach to index construction. The Statement of Principles is reviewed annually and any changes proposed by FTSE Russell are presented to the FTSE Russell Policy Advisory Board for discussion before approval by the FTSE Russell Product Governance Board.

The Statement of Principles can be accessed using the following link:

Statement of Principles.pdf

- 1.9 FTSE Russell hereby notifies users of the index series that it is possible that circumstances, including external events beyond the control of FTSE Russell, may necessitate changes to, or the cessation of, the index series and therefore, any financial contracts or other financial instruments that reference the index series or investment funds which use the index series to measure their performance should be able to withstand, or otherwise address the possibility of changes to, or cessation of, the index series.
- 1.10 Index users who choose to follow this index series or to buy products that claim to follow this index series should assess the merits of the index series rules-based methodology and take independent investment advice before investing their own or client funds. No liability whether as a result of negligence or otherwise is accepted by FTSE Russell (or any person concerned with the preparation or publication of these Ground Rules) for any losses, damages, claims and expenses suffered by any person as a result of:
 - any reliance on these Ground Rules;
 - any inaccuracies in these Ground Rules;
 - any non-application or misapplication of the policies or procedures described in these Ground Rules;
 and/or
 - any inaccuracies in the compilation of the index series or any constituent data.

FTSE Russell 4 of 31

Management responsibilities

Management responsibilities

2.1 FTSE International Limited (FTSE)

- 2.1.1 FTSE is the benchmark administrator of the index².
- 2.1.2 FTSE is responsible for the daily calculation, production and operation of the index, and will:
 - maintain records of the index weightings of all constituents;
 - make changes to the constituents and their weightings in accordance with the Ground Rules;
 - carry out periodic index reviews of the index and apply the changes resulting from the reviews as required by the Ground Rules;
 - publish changes to the constituent weightings resulting from their ongoing maintenance and the periodic reviews; and
 - disseminate the indices.

2.2 Amendments to these Ground Rules

- 2.2.1 These Ground Rules shall be subject to regular review (at least once a year) by FTSE Russell to ensure that they continue to best reflect the aims of the index series. Any proposals for significant amendments to these Ground Rules will be subject to consultation with FTSE Russell advisory committees and other stakeholders if appropriate. The feedback from these consultations will be considered by the FTSE Russell Index Governance Board before approval is granted.
- 2.2.2 Where FTSE Russell determines that the Ground Rules are silent or do not specifically and unambiguously apply to the subject matter of any decision, any decision shall be based as far as practical on the Statement of Principles. After making any such determination, FTSE Russell shall advise the market of its decision at the earliest opportunity. Any such treatment will not be considered as an exception or change to the Ground Rules, or to set a precedent for future action, but FTSE Russell will consider whether the Ground Rules should subsequently be updated to provide greater clarity.

FTSE Russell 5 of 31

The term administrator is used in this document in the same sense as it is defined in Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the European Benchmark Regulation) and The Benchmarks (Amendment and Transitional Provision) (EU Exit) Regulations 2019 (the UK Benchmark Regulation).

FTSE Russell index policies

FTSE Russell index policies

These Ground Rules should be read in conjunction with the following policy documents, which can be accessed using the links below:

3.1 Queries and Complaints

FTSE Russell's complaints procedure can be accessed using the following link:

FTSE_Russell_Benchmark_Determination_Complaints-Handling_Policy.pdf

3.2 Index Policy for Trading Halts and Market Closures

Guidance for the treatment of index changes in the event of trading halts or market closures can be found using the following link:

Index_Policy_for_Trading_Halts_and_Market_Closures.pdf

3.3 Index Policy in the Event Clients are Unable to Trade a Market or a Security

3.3.1 Details of FTSE Russell's treatment can be accessed using the following link:

Index Policy in the Event Clients are Unable to Trade a Market or a Security.pdf

3.4 Recalculation Policy and Guidelines

3.4.1 Where an inaccuracy is identified, FTSE Russell will follow the steps set out in the FTSE Russell Index Recalculation Guidelines when determining whether an index or index series should be recalculated and/or associated data products reissued. Users of the FTSE TPI Climate Transition Index Series will be notified through appropriate media.

For further information, please refer to the FTSE Russell Recalculation Policy and Guidelines document, which is available on the FTSE Russell website using the link below:

Recalculation Policy and Guidelines Equity Indices.pdf

3.5 Recalculation Policy and Guidelines – ESG Data and Scores

Where an inaccuracy in ESG data is identified, FTSE Russell will follow the guidelines set out in this document when determining if ESG data should be recalculated.

Recalculation Policy and Guidelines ESG Products.pdf

3.6 Policy for Benchmark Methodology Changes

Details of FTSE Russell's policy for making benchmark methodology changes can be accessed using the following link:

Policy_for_Benchmark_Methodology_Changes.pdf

FTSE Russell 6 of 31

3.7 FTSE Russell Governance Framework

To oversee its indices, FTSE Russell employs a governance framework that encompasses product, service and technology governance. The framework incorporates the London Stock Exchange Group's three lines of defence risk management framework and is designed to meet the requirements of the IOSCO Principles for Financial Benchmarks³, the European benchmark regulation⁴ and the UK benchmark regulation⁵. The FTSE Russell Governance Framework can be accessed using the following link:

FTSE Russell Governance Framework.pdf

3.8 Real Time Status Definitions

For indices that are calculated in real time, please refer to the following guide for details of real-time status definitions:

Real Time Status Definitions.pdf

FTSE Russell 7 of 31

³ IOSCO Principles for Financial Benchmarks Final Report, FR07/13 July 2013.

⁴ Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds.

The Benchmarks (Amendment and Transitional Provision) (EU Exit) Regulations 2019.

Eligible securities

4. Eligible securities

4.1 The eligible securities for each FTSE TPI Climate Transition index are the constituents of the corresponding underlying index detailed in Table 1.

Table 1

Index name	Underlying universe
FTSE Developed ex Korea TPI Climate Transition Index	FTSE Developed ex Korea Index
FTSE Developed ex US TPI Climate Transition Index	FTSE Developed ex US Index
Russell 1000 TPI Climate Transition Index	Russell 1000 Index
FTSE Japan TPI Climate Transition Index	FTSE Japan Index
FTSE All World ex Japan TPI Climate Transition Index	FTSE All World ex Japan Index
FTSE All-World ex FF TPI Climate Transition Index	FTSE All-World Index

4.3 Minimum set of exclusions

Indices in this Index Series apply the minimum set of exclusions with effect from October 2023. The Russell 1000 TPI Climate Transition Index apply the minimum set of exclusions with effect from June 2024.

The following FTSE TPI Climate Transition indices apply the minimum set of exclusions from the start of index launch:

- FTSE Australia 300 TPI Climate Transition Index
- FTSE Australia 200 TPI Climate Transition Index
- FTSE Australia 100 TPI Climate Transition Index
- FTSE Developed ex Australia TPI Climate Transition Index
- FTSE Emerging TPI Climate Transition Index
- FTSE New Zealand TPI Climate Transition Index
- Russell 1000 TPI Climate Transition 2GR Index
- FTSE Developed ex North America ex Korea ex Poland TPI Climate Transition 2GR Index
- Russell 1000 TPI Climate Transition 2GR Index

Details of the minimum exclusions can be found in the Guide_to_the_Construction_and_Maintenance_of_FTSE_Exclusion_Lists.pdf.

4.4 Multiple lines

4.4.1 All lines of the same company that are eligible securities are eligible for inclusion in the index, where they are eligible for the underlying index.

FTSE Russell 12 of 31

ESG data inputs

ESG data inputs 5.

5.1.1 The following ESG datasets are used in the construction of the FTSE TPI Climate Transition Index Series.

ESG data inputs	Details	Used for selection, weighting or exclusion ⁸
FTSE Green Revenues	FTSE Russell's green revenues data model identifies companies providing green products and services and classifies associated revenues based on the Green Revenues Classification System (GRCS). GRCS is a taxonomy used to define and measure the industrial transition to a green economy.	Weighting
	More information can be found here:	
	ftse-green-revenues-classification-system.pdf	
TPI Management Quality (MQ)	FTSE Russell's TPI management quality (MQ) data evaluates and tracks the quality of companies' governance/management of their greenhouse gas emissions and of risks and opportunities related to the low-carbon transition. More information can be found here:	Weighting
	https://www.transitionpathwayinitiative.org/methodology	
TPI Carbon Performance (CP) scores	TPI carbon performance (CP) scores assess how companies' carbon performance now and in the future might compare to the international targets and national pledges made as part of the Paris Agreement. More information can be found here:	Weighting
	https://www.transitionpathwayinitiative.org/methodology	
FTSE Carbon Reserves	FTSE carbon reserves data model provides granular coverage of fossil fuel reserve ownership among publicly listed companies in developed markets and emerging economies. More information can be found here: Guide to FTSE and Third Party ESG Data used in FTSE Russell Indices	Weighting
FTSE Carbon Emissions	The FTSE carbon emissions dataset provides reported and estimated emissions data for both the assets and activities controlled by global publicly listed companies and their entire value chain (upstream and downstream activities). More information can be found here: Guide to FTSE and Third Party ESG Data used in FTSE Russell Indices	Weighting
Product-related data – FTSE Russell	FTSE exclusion lists on the activities of companies with exposure to the products or services that are listed in Section 7 of the <u>Guide to the Construction and Maintenance of FTSE Exclusion Lists.pdf.</u>	Exclusion
Conduct related data – FTSE Russell	FTSE exclusion lists on the activities of companies that are directly or indirectly linked to controversial conduct and diversity. More information can be found here: section 7 of the Guide to the Construction and Maintenance of FTSE Exclusion Lists.pdf .	Exclusion

FTSE Russell 13 of 31

Selection – ESG data is used to select or rank constituents or calculate minimum scores or thresholds. Weighting – ESG data is used to calculate the weight of a constituent in an index. Exclusion – ESG data is used to ex

ESG data inputs	Details	Used for selection, weighting or exclusion ⁸
Conduct related data – Sustainalytics	Sustainalytics Global Standards Screening (GSS) assess companies' impact on stakeholders and the extent to which a company causes, contributes or is linked to violations of international norms and standards. More information can be found: <a href="https://www.sustainalytics.com/investor-solutions/esg-research/esg-screening/global-compact-norms-based-screening and Guide to FTSE and Third Party ESG Data used in FTSE Russell Indices</th><th>Exclusion</th></tr><tr><th>Conduct related data – RepRisk</th><th>The RepRisk Index (RRI) captures and quantifies a company's reputational risk exposure to ESG issues. More information can be found: https://www.reprisk.com/news-research/resources/methodology	Exclusion
Minimum set of exclusions for ESG indices	The minimum set of exclusions apply according to rule 4.3. Details of the minimum exclusions can be found in Section 8 of the Guide to the Construction and Maintenance of FTSE Exclusion Lists.pdf .	Exclusion
Carbon Emissions and Carbon Reserves data – Trucost	Trucost environmental data measures environmental impact including greenhouse gas emissions and fossil fuel reserves. More information can be found: https://www.marketplace.spglobal.com/en/datasets/trucost-environmental-(46)	Weighting

- 5.1.2 TPI Carbon Performance scores have lower data coverage in certain markets and for smaller companies. This may limit the re-weighting based on this data set for single market indices in this index series. It is expected that data coverage will increase over time.
- 5.1.3 Further information on ESG data provided by FTSE Russell and third parties used in this index (index series) can be found in the following guide:

<u>Guide_to_FTSE_and_Third_Party_ESG_ESG_Data_used_in_FTSE_Russell_Indices.</u> This includes information on the data and standards used for these ESG data inputs. These data sets may include estimated data.

5.2 ESG metrics

5.2.1 Please see the FTSE Russell <u>ESG Metrics</u> website for the scores and values of the environmental, social and governance (ESG) factors listed in Annex II to Delegated Regulation (EU) 2020/1816.

Further details on the metrics methodology and calculation are available using the following link:

 $https://www.lseg.com/content/dam/ftse-russell/en_us/documents/policy-documents/esg-disclosures-metric-methodology-and-calculation-guide.pdf\\$

FTSE Russell 14 of 31

Index construction

Index construction

- 6.1 The Transition Pathway Initiative (TPI)
- 6.1.1 TPI assesses companies' progress on the transition to a low-carbon economy on two dimensions: Management Quality (MQ) and Carbon Performance (CP).
- 6.1.2 MQ scores are derived from the climate theme data from FTSE Russell's ESG data model based on TPI's methodology, which is published on the public website:

 https://www.transitionpathwayinitiative.org/methodology
- 6.1.3 Companies that receive an CP score are categorized into different groups, which are described in the <u>Guide</u> to <u>FTSE and Third Party ESG Data used in FTSE Russell Indices</u> and are provided by TPI on an annual basis.
- 6.2 Index construction
- 6.2.1 The unconstrained index weight of each constituent in the FTSE Climate TPI Transition Index Series w_i is:

$$w_i = \frac{v_i}{\sum_j v_j}$$

where:

$$v_i = w_i' \times A_i^{FF} \times A_i^{CE} \times A_i^{GR} \times A_i^{MQ} \times A_i^{CP}$$

and:

- w'_i is the free float adjusted market capitalisation weight of stock i in the eligible universe.
- A_i^{FF} is the fossil fuel reserve adjustment for stock i (see rule 6.2.3).
- A_i^{CE} is the low operational carbon emissions adjustment for stock i (see rule 6.2.3).
- A_i^{GR} is the green revenue adjustment for stock i (see rule 6.2.3).
- A_i^{MQ} is the TPI management quality adjustment for stock i (see rule 6.2.4).
- A_i^{CP} is the TPI carbon performance adjustment for stock i (see rule 6.2.5).
- 6.2.2 Indices in the FTSE Climate TPI Transition Index Series are constructed using either <u>fixed tilt</u> or <u>target exposure</u> tilt methodologies.

Fixed tilt indices: the strength of the factor tilt is a fixed number for all rebalances.

Target exposure indices: variable tilt strengths are chosen to satisfy fixed exposure targets.

See FTSE Global Factor Index Series for more details on index construction.

FTSE Russell 15 of 31

- 6.2.3 **Fossil fuel reserves** tilts, **operational carbon emissions** tilts and **green revenue** tilts are based on each company's fossil fuel reserves, operational carbon emissions and the FTSE Green Revenues Factor, respectively. These tilts follow the definitions and methodologies as detailed in FTSE Global Climate Index Series Ground Rules and the FTSE Green Revenues Index Series Ground Rules except the following indices that have further modifications listed below:
 - FTSE Australia 300 TPI Climate Transition Index
 - FTSE Developed ex Australia TPI Climate Transition Index
 - FTSE Emerging TPI Climate Transition Index
 - Russell 1000 TPI Climate Transition 2GR Index
 - FTSE Developed ex North America ex Korea ex Poland TPI Climate Transition 2GR Index
 - FTSE Australia 100 TPI Climate Transition Index
 - FTSE Australia 200 TPI Climate Transition Index
 - FTSE New Zealand TPI Climate Transition Index

 A_i^{GR} in the above indices plus the Russell 1000 TPI Climate Transition Index are defined as $(\mathbf{1} + \mathbf{GRR_i})$, where GRR_i is the FTSE Green Revenues ratio defined in the FTSE Green Revenues Index Series Ground Rules. If constituent green economy data is not available, GRR_i will be set to 0.

The above indices use FTSE in-house carbon emission and fossil fuel reserve data and the missing fossil fuel reserve data treatment is different than 5.4.3 in the FTSE Global Climate Index Series. It is defined and treated as following:

- Companies in the ICB sub-sector Coal (60101040) which do not have reserve data available are assigned the average Z-score of companies in the Coal sub-sector. If there are no companies in the Coal sub-sector with reserve data, the Z-score of 0 is assigned.
- Companies in the following ICB sub-sectors which do not have reserve data available are assigned the average Z-score of all companies in this group of sub-sectors. If there are no companies in this group of sub-sectors with reserve data, a Z-score of 0 is assigned.
 - Integrated Oil and Gas (60101000)
 - Oil: Crude Producers (60101010)
 - Offshore Drilling and Other Services (60101015)
 - Oil Refining and Marketing (60101020)
 - Oil Equipment and Services (60101030)
 - Pipelines (60101035)
- If there are no companies outside of the specified ICB sub-sectors with reserve data, a Z-score of 0 is assigned.

The Russell 1000 TPI Climate Transition 2GR Index and the FTSE Developed ex North America ex Korea ex Poland TPI Climate Transition 2GR Index uses company Green Revenue including tier 3 excluding nuclear.

FTSE Russell 16 of 31

6.2.4 The **TPI management quality adjustment** for stock i is defined as:

$$A_i^{MQ} = \left(S_i^{MQ}\right)^a \times w_k'/w_k^{MQ}$$

where management quality Z-scores are mapped to a S-score $S_i^{MQ} \in [0,1]$, using the cumulative normal distribution with mean zero and standard deviation one. The creation of S-scores follows the process described in the FTSE Global Factor Index Series Ground Rules; k is the ICB regional industry that stock i belongs to, w_k' is the free float adjusted market capitalisation regional industry weight of the eligible universe and w_k^{MQ} is the regional industry weight determined by applying a double tilt using the S-score S_i^{MQ} to the free float adjusted market capitalisation stock weights of the underlying universe, a equals 2 for all fixed tilt TPI indices except for the Russell 1000 TPI Climate Transition 2GR Index and the FTSE Developed ex North America ex Korea ex Poland TPI Climate Transition 2GR Index where a equal to 0.3

The FTSE TPI Climate Transition Index Series splits the eligible universe into the following regions: North America, Europe, Latin America, Middle East and Africa, Japan and Asia-Pacific ex Japan.

- 6.2.5 The TPI carbon performance adjustment A_i^{CP} is assigned to each of the groups detailed in the Guide to FTSE and Third Party ESG Data used in FTSE indices as follows:
 - Companies that are aligned to below 2°C (Pulp and Paper) or 1.5°C (all other sectors) are assigned an adjustment factor of 2.
 - Companies that are aligned to 2°C (Pulp and Paper) or 2°C (all other sector) are assigned an adjustment factor of 1.5.
 - Companies are aligned to the Paris Pledges (Pulp and Paper) or National Pledges/International Pledges
 (all other sectors) level are assigned an adjustment factor of 0.8.
 - Companies that are not aligned or have insufficient disclosures to enable such an assessment are
 assigned an adjustment factor of 0.2.for the Russell 1000 TPI Climate Transition 2GR Index and the
 FTSE Developed ex North America ex Korea ex Poland TPI Climate Transition 2GR Index and 0 for all
 other indices
 - Companies are that not assessed are assigned an adjustment of 1.

6.3 Capacity constraints and minimum stock weights

- 6.3.1 The maximum stock level capacity ratio and constraints are applied to the index without narrowing as detailed in the FTSE Global Factor Index Series Ground Rules.
- 6.3.2 Any company that is aligned to below 2°C/1.5°C or 2°C/below 2°C or in the TPI Carbon Performance assessment with the index weight less than the minimum stock level weight is set as the minimum stock level weight listed in Table 1.
- 6.3.3 A minimum stock level weight in Table 1 is then applied to the remaining constituents that are not covered in rule 5.3.2. Any security level index weight that is less than this minimum weight threshold is treated as having a zero weight in the FTSE TPI Climate Transition Index Series. Any resulting excess weight will be redistributed amongst the remaining constituents and may cause breaches of the constraints in rule 6.3.1.

6.4 Country and industry exposure constraints

6.4.1 The maximum active country and industry exposure constraints are defined by the parameters *P* and *Q* are applied to the index as detailed in the FTSE Global Factor Index Series Ground Rules.

6.5 Active Stock Level Capping

6.5.1 Companies are capped at 1.5% overweight to benchmark at each review for the Russell 1000 TPI Climate Transition 2GR Index and the FTSE Developed ex North America ex Korea ex Poland TPI Climate Transition 2GR Index

FTSE Russell 17 of 31

6.6 Capping

- For the indices in the FTSE TPI Climate Transition Index Series, except for the FTSE Japan TPI Climate Transition Index, the capping will be based on prices at the close on the Wednesday before the first Friday of the review month and will use shares and free float adjustment as of the effective date.
- For the FTSE Japan TPI Climate Transition Index, the capping will be based on prices at the close on the second Friday of the review month and will use shares and free float adjustment as of the effective date.

6.7 Index back-histories

- 6.7.1 The annual fossil fuel reserves, operational carbon emissions and annual sales data prior to June 2017 are lagged by one year.
- 6.7.2 TPI data as of September 2018 is used in the index review process prior to 2018.

FTSE Russell 18 of 31

Periodic review of constituents

7. Periodic review of constituents

7.1 Review dates

- 7.1.1 The FTSE TPI Climate Transition Index Series will be reviewed annually in September with the exception of the following indices:
 - FTSE Global Core Infrastructure TPI Climate Transition Index
 - Russell 1000 TPI Climate Transition Index
 - Russell 1000 TPI Climate Transition 2GR Index

The FTSE Global Core Infrastructure TPI Climate Transition Index will be updated semi-annually in March and September. The Russell 1000 TPI Climate Transition Index and the Russell 1000 TPI Climate Transition 2GR Index will be reviewed in June.

The data cut-off dates for ESG data inputs are in the <u>Guide-to-FTSE-and-Third-Party-ESG-Data-used-in-FTSE-Russell-Indices.pdf</u>

- 7.1.2 Index reviews will use stock prices available as at the close of business on the Wednesday before the first Friday of the review month (price cut-off date) and use shares and free float adjustment as of effective date.
 - FTSE TPI Climate Transition indices based on Russell indices will use stock prices available as at the close of business on the Wednesday before the second Friday of the review month (price cut-off date) and use shares and free float adjustment as of effective date.
- 7.1.3 The review will be implemented after the close of business on the third Friday of the review month.
 - For FTSE TPI Climate Transition indices derived from a Russell index, the review will be implemented on the same day as the Russell annual reconstitution. For details of the implementation dates of Russell indices, please refer to the Russell US Equity Indices construction and methodology, available at Russell US.

FTSE Russell 22 of 31

Changes to constituent companies

Changes to constituent companies

8.1 Intra-review additions

8.1.1 Additions to the corresponding underlying index will be assessed for inclusion to the FTSE TPI Climate Transition Index at the next annual review of the relevant FTSE TPI Climate Transition Index, respectively.

8.2 Intra-review deletions

8.2.1 A constituent will be removed from a FTSE TPI Climate Transition Index if it is being removed from its corresponding underlying index and its weight will be distributed pro-rata amongst the remaining constituents in their respective FTSE TPI Climate Transition Index.

8.3 Intra-review changes to exclusion lists

- 8.3.1 A constituent will be deleted from the FTSE TPI Climate Transition Indices if it is added to the corresponding exclusion lists detailed in table one in rule 4.1. The deletion will be concurrent with its addition to the exclusion lists.
- 8.3.2 A stock that is removed from a relevant exclusion list detailed in table one in rule 4.1 will be considered for inclusion at the next periodic review.

FTSE Russell 23 of 31

Corporate actions and events

Corporate actions and events

- 9.1 If a constituent in the underlying index has a stock split, stock consolidation, rights issue, bonus issue, a change in the number of shares in issue or a change in free float, the constituent's weighting in the FTSE TPI Climate Transition Index Series will remain unchanged pre and post such an event.
- 9.2 Full details of changes to constituent companies due to corporate actions and events can be accessed in the Corporate Actions and Events Guide for Non Market Cap Weighted Indices using the following link:

Corporate_Actions_and_Events_Guide_for_Non_Market_Cap_Weighted_Indices.pdf

A corporate action is an action on shareholders with a prescribed ex-date. The share price will be subject to an adjustment on the ex-date. The index will be adjusted in line with the ex-date.

These include the following:

- capital repayments;
- rights issues/entitlement offers;
- stock conversion;
- · splits (sub-division)/reverse splits (consolidation); and
- scrip issues (capitalisation or bonus issue).

A corporate event is a reaction to company news (event) that may impact the index depending on the index rules. For example, a company announces a strategic shareholder is offering to sell their shares (secondary share offer) – this could result in a free float weighting change in the index. Where an index adjustment is required, FTSE will provide notice advising of the timing of the change.

9.3 Suspension of dealing

Suspension of dealing rules can be found within the Corporate Actions and Events Guide for Non Market Cap Weighted Indices.

9.4 Takeovers, mergers and demergers

The treatment of takeovers, mergers and demergers can be found within the Corporate Actions and Events Guide for Non Market Cap Weighted Indices.

FTSE Russell 24 of 31

Indices algorithm and calculation method

10. Indices algorithm and calculation method

10.1 Prices

10.1.1 The FTSE TPI Climate Transition Index Series use actual closing mid-market or last trade prices, where available, for securities with local market quotations. Further details can be accessed using the following link:

Closing Prices Used For Index Calculation.pdf

10.2 Calculation frequency

10.2.1 The FTSE TPI Climate Transition Index Series will be calculated on an end-of-day basis and displayed to eight decimal points.

10.3 Index calculation

10.3.1 The FTSE TPI Climate Transition Index Series is calculated using the algorithm described below:

$$\sum_{i=1}^{N} \frac{\left(p_i \times e_i \times s_i \times f_i \times c_i\right)}{d}$$

Where:

- *i*=1,2,...,*N*
- N is the number of securities in the index.
- p_i is the latest trade price of the component security (or the price at the close of the index on the
 previous day).
- e_i is the exchange rate required to convert the security's currency into the index's base currency.
- s_i is the number of shares in issue used by FTSE Russell for the security, as defined in these Ground Rules.
- f_i is the investability weighting factor to be applied to a security to allow amendments to its weighting, expressed as a number between 0 and 1, where 1 represents a 100% free float. This factor is published by FTSE Russell for each security in the underlying index.
- c_i is the Weighting Factor to be applied to a security to correctly weight that security in the index. This
 factor maps the investable market capitalisation of each stock to a notional market capitalisation for
 inclusion in the index.
- d is the divisor, a figure that represents the total issued share capital of the index at the base date. The
 divisor can be adjusted to allow changes in the issued share capital of individual securities to be made
 without distorting the index.

Appendix A

Exclusions

Product-related exclusions

	Product involvement categories	Involvement threshold for exclusion
Non-	Fossil fuel reserves – coal, oil and gas	
renewable energy	Companies that own proved or probable reserves in coal, oil or gas	Greater than 50% ownership
	Fossil fuel revenues	
	Oil & gas	
	Production: involvement in exploration, production, refining, transportation and storage of oil and/or gas.	Direct involvement: Greater than 0% of revenues Ownership of 10% and above
	Supporting products/services: involvement in exploration, production, refining, transportation and storage of oil and/or gas.	Direct involvement: Equal or greater than 5% of revenues Ownership of 10% and above
	Generation: involvement in exploration, production, refining, transportation and storage of oil and/or gas.	Direct involvement: Greater than 0% of revenues
		Ownership of 10% and above
	Companies classified in the following ICB Subsectors:	Not applicable
	60101010 Oil: Crude Producers;	
	60101020 Oil Refining and Marketing;	
	60101030 Oil Equipment & Services;	
	60101015 Offshore Drilling and Other Services;	
	• 60101035 Pipelines;	
	60101000 Integrated Oil and Gas	
	65102020 Gas Distribution	
	Oil sands	
	Extraction: involvement in extraction of oil sands.	Direct involvement: Greater than 0% of revenues
		Ownership of 10% and above
	Arctic oil & gas exploration	
	Extraction: involvement in oil and gas exploration in Arctic regions.	Direct involvement: Greater than 0% of revenues
		Ownership of 10% and above
	Shale energy	

FTSE Russell 26 of 31

	Product involvement categories	Involvement threshold for exclusion
	Extraction: involvement in extraction of shale energy exploration and/or production.	Direct involvement: Greater than 0% of revenues Ownership of 10% and above
	Thermal coal	
	Extraction: involvement in the extraction of thermal coal.	Direct involvement: Greater than 0% of revenues Ownership of 10% and above
	Power generation: involvement in the generation of electricity from thermal coal.	Direct involvement: Greater than 0% of revenues Ownership of 10% and above
	Supporting Products/Services: involvement in tailor-made products and services that support thermal coal extraction	Direct involvement: Greater than 5% of revenues Ownership of 10% and above
	Companies classified in the following ICB Subsector: • 60101040 Coal	Not applicable
	Coal reserves	
	Companies that own proved or probable reserves in coal	Greater than 50% ownership
Tobacco	Tobacco	
	(A) Tobacco products including cigarettes, roll your own tobacco, pipe tobacco, cigars, cigarillos, bidis, gutka, smokeless tobacco and heated tobacco products (HTPs). Electronic cigarettes (or e-cigarettes) and electronic nicotine delivery systems.	Greater than 0% of revenues
	This includes:	
	all companies that are classified in the Industry Classification Benchmark (ICB) subsectors tobacco (3785) (new ICB subsector tobacco 45103010) and cannabis producers 20103020); and	Not applicable
	companies that are not classified in ICB subsector tobacco (tobacco 45103010) and cannabis producers 20103020), but that are identified as having activity in this subsector.	Greater than 0% of revenues
	(B) Companies providing inputs into tobacco products/manufacturing, but not including retail. This includes rolling papers, tobacco flavouring and tobacco-specific packaging.	Greater than 0% of revenues
Controversial	Chemical and biological weapons	
weapons	Companies producing chemical or biological weapons and their components, including all precursors, munitions, devices or equipment specifically designed for, and used directly in connection with, these weapons.	Greater than 0% of revenues
	Secondary products and services to chemical and biological weapons that are specific to chemical and biological weapons	
	Cluster munitions	
	Companies producing cluster munitions as defined in the convention on cluster munitions and their components, including all precursors, munitions, devices or equipment specifically designed for, and used directly in connection with, these weapons.	Greater than 0% of revenues
	Secondary products and services to cluster munitions that are specific to cluster munitions.	
	Anti-personnel landmines	
	Companies that produce anti-personnel mines as defined in the 1997 Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction (Ottawa Convention).	Greater than 0% of revenues
	Secondary products and services to anti-personnel mines that are specific to anti-personnel mines.	

FTSE Russell 27 of 31

	Product involvement categories	Involvement threshold for exclusion
Nuclear	Nuclear weapons	
weapons	Companies that produce nuclear weapons or their components. This includes companies that provide delivery systems (e.g. ballistic missile submarines) or critical services (e.g. maintenance or IT) that are directly related to and specifically designed for nuclear weapons.	Greater than 0% of revenues
Military	Military weapons	
weapons	Companies that produce other weapons for military use. This includes: munitions; vehicles designed to carry military weapons (mounted or demountable); weapons delivery systems; including mounting and launching systems as well as targeting; and guidance systems	Greater than 0% of revenues
Firearms	Firearms	
	Companies that produce firearms or ammunition for non-military use. This includes: • shotguns	Greater than 0% of revenues
	rifles; andsemi-automatic weapons.	

Conduct-related exclusions9

	Exclusion	
Controversies*	Human rights	For large and mid-cap size: - Companies assigned non-compliant status For small-cap size: - Companies assigned watchlist or non-compliant status
	Controversies related to principles 1 and 2 of the UN Global Compact, which is derived from the Universal Declaration of Human Rights.	
	Principle 1: businesses should support and respect the protection of internationally proclaimed human rights.	
	Principle 2: make sure that they are not complicit in human rights abuses.	
	Labor	
	Controversies related to Principles 3, 4, 5, and 6 of the UN Global Compact, which is derived from the International Labour Organization's Declaration on Fundamental Principles and Rights at Work.	
	Principle 3: businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;	
	Principle 4: the elimination of all forms of forced and compulsory labour;	
	Principle 5: the effective abolition of child labour; and	
	Principle 6: the elimination of discrimination in respect of employment and occupation.	
	Environment	
	Controversies related to principles 7, 8, and 9 of the UN Global Compact, which is derived from the Rio Declaration on Environment and Development.	
	Principle 7: businesses should support a precautionary approach to environmental challenges.	
	Principle 8: undertake initiatives to promote greater environmental responsibility; and	
	Principle 9: encourage the development and diffusion of environmentally friendly technologies.	
	Anti-corruption	

Onduct-related exclusions regarding controversies utilise data sourced from Sustainalytics' Global Standards Screening (GSS) dataset, FTSE Russell and RepRisk. Please refer to the <u>Guide to FTSE and Third Party ESG Data used in FTSE Indices</u> for further details.

FTSE Russell 28 of 31

Exclusion	
Controversies related to principle 10 of the UN Global Compact, which is derived from the United Nations Convention Against Corruption.	
Principle 10: businesses should work against corruption in all its forms, including extortion and bribery.	

^{*} For companies excluded, if their SA GSS assessment changes, the companies will be considered for removal from the exclusion list according to Rule 7.3.2 in the Guide to the Construction and Maintenance of FTSE Exclusion Lists, which can be accessed using the following link:

Guide_to_the_Construction_and_Maintenance_of_FTSE_Exclusion_Lists.pdf

Minimum exclusions

Please refer to Section 8 of the <u>Guide to the Construction and Maintenance of FTSE Exclusion Lists</u> for the description of minimum exclusions applied.
