

## INDEX OVERVIEW

# Straits Times Index (STI)

The benchmark index for the local Singapore stock market

### Overview

The Straits Times Index (STI) is a highly recognised benchmark index and market barometer for Singapore. With a history dating back to 1966, it tracks the performance of the top 30 largest and most liquid companies listed on the Singapore Exchange. It is also the headline index of the FTSE ST Index Series, a family of indices created by SPH Media Ltd (SPH Media), Singapore Exchange and FTSE Group, offering a wider set of investment choices and opportunities by segmenting the Singapore market. FTSE Russell has been managing the ST Index since 2008 and carried out enhancements to the index to strengthen its liquidity rule in 2015.

### Features

#### Strict liquidity requirement:

The liquidity rule for the ST Index has been strengthened since 2015 by increasing the percentage of the shares in issue that securities must turnover in a given period. Securities must have a monthly median turnover of >0.10% of their shares in issue to be eligible for inclusion.

#### Rigorously maintained:

Semi-annual reviews, daily corporate actions, fast-entry IPO inclusions and share adjustments ensure that the ST Index accurately represents the true opportunity set.

#### Transparency and governance:

Managed according to a publicly available, transparent rule set, and in accordance with FTSE Russell's global best practice standards of index governance.

#### Established ecosystem:

A comprehensive ecosystem has been built up with ETFs and index futures tracking the ST Index available in the market.
